

## The Leader in IC Programming for Security Devices:

### ➤ Key Features of Programming Security Devices

- ✓ Preventing Duplication
- ✓ Traceability
- ✓ File and Data Storage
- ✓ IP Security
- ✓ Concurrency
- ✓ Scalability

### ➤ Highest quality standards:

- ✓ ISO 9002 registered/certified
- ✓ TS16949 registered/certified
- ✓ ESD JESD 625 certified
- ✓ ESD Class "0" Facilities

### The Avnet – Renesas Relationship

Avnet is the established leader in IC programming for security devices:

Avnet can provide a full range of serialization and security service offerings requiring high levels of security protocols to assure customer information is not compromised. These include MAC Addresses, RFID tags, HDCP keys and license keys. Key and X509 certificate generation services (PKI technology) are also provided.

Renesas Electronics is a leading global supplier of security IC technology which enable machine-to-machine authentication to protect code, consumables, and authenticate access to the processor.

**Avnet Electronics Marketing is the first global distributor certified by Renesas Electronics America to program the company's Security IC product named 'Board ID'.**
